Department of Artificial Intelligence and Data Science ASSIGNMENT

SUBJECT TITLE	RESEARCH METHODOLOGY & IPR		
SUBJECT TYPE			
SUBJECT CODE	BRMK557		
ACADEMIC YEAR	2024-25	BATCH	2022-26
SCHEME	2022 scheme		
SEMESTER	Vth semester		
FACULTY NAME and DESIGNATION	Darshan A, Assistant Professor		

<i>Module -1</i>			
<i>Q. No.</i>	<i>Questions</i>	<i>Bloom's LL</i>	<i>COs</i>
1	Explain the concept of "Engineering Research" and describe the primary objectives that drive research in this field.	L2	
2	Summarize the different types of research misconduct and discuss how each one impacts the credibility of engineering research.	L2	
3	Identify a significant problem in engineering research within a chosen field and propose a basic approach for solving it, considering the criteria for a worthwhile problem.	L3	
4	Demonstrate how ethics are integrated into engineering research practice by providing a detailed example of an ethical dilemma and its resolution.	L3	
5	Apply the principles of ethical research practice to a case study in engineering, analyzing how ethical standards influence the outcomes of the research.	L3	
6	Analyze the motivations for conducting engineering research and evaluate their importance in advancing technology and solving real-world problems.	L4	
7	Evaluate a real-world case of engineering research misconduct and assess the impact it had on the field, particularly on public trust and further research efforts.	L5	

<i>Module -2</i>			
<i>Q. No.</i>	<i>Questions</i>	<i>Blooms LL</i>	<i>COs</i>
1	Describe the purpose and function of bibliographic databases like Web of Science, Google Scholar, and Google in conducting a literature review. Include their advantages and limitations in your answer.	L2	

2	Explain how effective search strategies contribute to gathering relevant literature for a research project. Provide examples of techniques used in effective searches.	L2	
3	Apply your understanding of technical reading to develop a strategy for reading complex technical documents, such as a data sheet or mathematical algorithms. Outline steps you would follow to comprehend and analyze the content.	L3	
4	Use appropriate citation styles to demonstrate how datasets should be cited in a research paper. Explain the importance of proper dataset citation with examples.	L3	
5	Illustrate the impact of well-chosen titles and keywords on citation rates in academic publications. Provide examples of effective titles and keywords.	L3	
6	Analyze the role of attributions and acknowledgments in academic research. Distinguish between when to use citations versus acknowledgments, and describe the ethical importance of each.	L4	
7	Evaluate the importance of critical and creative reading in research. Discuss how these reading skills contribute to knowledge synthesis and the development of new research questions.	L5
