Chickballapur – 562 101

Department of Artificial Intelligence and Data Science

Tutorial - 1

SUBJECT TITLE	Software Engineering and Project Management		
SUBJECT TYPE	CORE		
SUBJECT CODE	BCS501		
ACADEMIC YEAR	2024-25 (odd semester)	Batch	2023-2027
SCHEME	OBE & CBCS scheme(2022 scheme)		
SEMESTER	V		
FACULTY NAME and DESIGNATION	Prof. Naveen Kumar V G (ASSISTANT PROFESSOR)		
DATE of ISSUED			

Module -1			
Q. No.	Questions	Level	COs
1	Define software and explain the nature of software?	L1	CO1
2	Explain different software application domains.	L2	CO1
3	List and brief the unique nature of WebApps.	L1	CO1
4	Define software engineering and explain its features in detail.	L1,L2	CO1
5	Discuss how the David Hooker seven principles focus on software engineering practice.	L1	CO1
6	Illustrate the generic process framework activities and umbrella activities.	L3	CO1
7	Explain in detail the essence of software engineering practice.	L2	CO1
8	Summarize Myths at different stages in Software Engineering.	L2	CO1
9	Illustrate the working nature of waterfall model and why this model gets critics?	L3	CO1
10	Create generic process framework that is applicable to any software project// Relationship between work Product, Task, Activity, System?	L4	CO1
11	Illustrate major work products produced for each unified process phase	L3	CO1

12	If you have to develop a word processing Software Product, What Process model will you choose? Justify your answer. Explain this Proposed Model with a Neat diagram	L5	CO1
13	Where and how the incremental process models works? Explain with an example.	L2	CO1
14	Justify why concurrent development model is also called as concurrent engineering.	L3	CO1
15	Analyze and discuss which process model is best suited for risk management	L5	CO1
16	Explain in detail the spiral model with its distinguished features.	L3	CO1
17	Write a short note on specialized process models.	L2	CO1
18	Justify the statement “software has characteristics that are considerably different than those hardware”	L3	CO1
19	Illustrate various process flow with help of neat sketch	L3	CO1
20	Distinguish between prototype model and spiral model	L2	CO1
21	What are requirement-engineering task? Explain in detail.	L2	CO2
22	Define Requirement Elicitation. Discuss the Collaborative requirements gathering in detail.	L1,L2	CO2
23	Explain the steps required to establish the groundwork for an understanding of software requirements	L2	CO2
24	Explain the significance of developing use case diagram with an example.	L2	CO2
25	Explain the steps to be followed for validating requirements in detail	L2	CO2
26	Give three reasons why requirements negotiation is needed in software engineering	L1	CO2
27	Explain three types of QFD with examples	L2	CO2
