Prefix
un

Root
happy

Page No.

Suffix
ness

NLP Phases :- / Steps.

① Morphological analysis / Lexical analysis :- Word Analysis.

1. Tokenization :- Extracting the sentence and breaking it into words / tokens

Ex:- Raj ate the Pizza

Raj ate the Pizza

② Stop word Removal :- Removing pronouns such as he, she, it, the, in etc which are not so essential for the sentence.

Ex:- When we remove stopword

Raj ate Pizza

③ Stemming :- is a process of reducing words into the base form (Root form / Stem form)

Ex: John ate Pizza | run, running, ran → run
John eat Pizza | Stemmer, Stemming, Stemmed → Stem

④ N-Gram Language Model :-

1-gram [Raj] [ate] [the] [Pizza]

Bi-gram [Raj ate] [the Pizza]

Tri-gram [Raj ate the] Pizza

4-gram [Raj ate the Pizza]

When the Qⁿ is asked

Raj ate the ____?

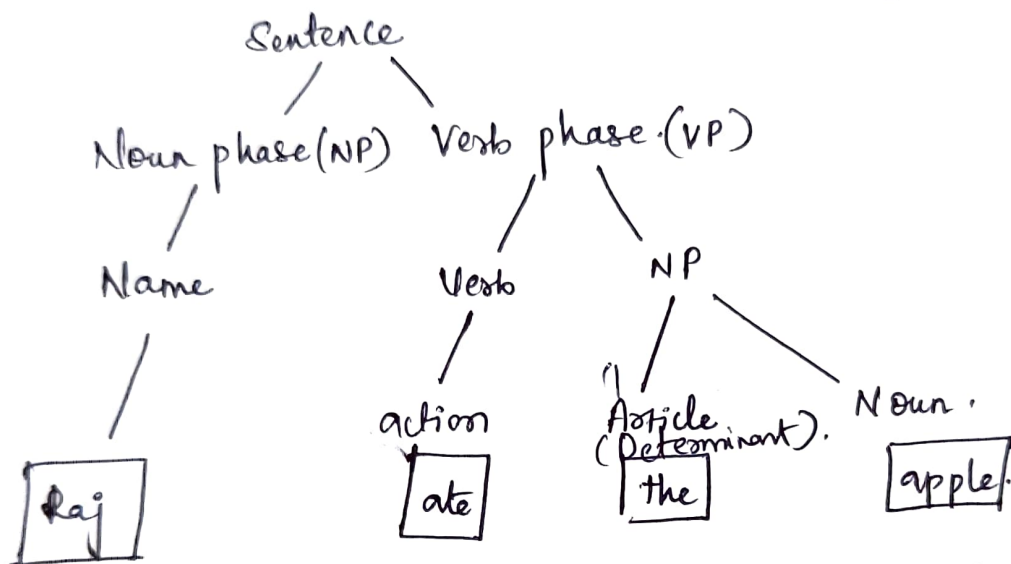

(II) Syntactical Analysis :- To check whether the Given Sentence is correct/wrt.

EX:- Raj ate the apple. ✓

Verb, ate the Raj apple X.

Rules for framing the Sentence :-

No Rule Starting with Verb so, cannot construct a Parse tree.

(III) Semantic Analysis :- Finding the Meaning from the Sentence.

She drank Some Milk ✓

She drank Some Books X.

Finding the Relation between the words to make it meaningful.
to using the graph.

(IV) Discourse Analysis :- Current Sentence depends on the Content on the previous words.

EX:- Raj ate Pizza, when he was hungry.

(V) Pragmatic Analysis :- Analysis of the Sentence will be done based on the situation and persons.

EX:- close the door
→ order
