SJC INSTITUTE OF TECHNOLOGY

(An Autonomous Institution under VTU from 2024-25)

AICTE Approved, Accredited by NBA (CSE, ISE, ECE, ME, CV, AE) & NAAC with A+ Grade, QS I-Gauge Gold rated
Chikkaballapura - 562 101, Karnataka

Estd. 1986

Department of Civil Engineering

Tutorial - III

Subject: Water Conservation and Rain Water Harvesting (BCV654A)

1. Explain the role of water conservation in reducing the energy footprint of water treatment and distribution?
2. What are the major sources of water pollution, and how can they be controlled to ensure clean water for consumption?
3. Discuss some effective measures to limit water consumption in residential, agricultural, and industrial sectors?
4. Explain the benefits of water reuse in households, agriculture, and industries?
5. What are the impacts of water losses due to leaks in pipelines, and how can they be minimized?
6. Describe the environmental impacts of industries that fail to adopt water conservation practices?
7. Describe the significance of geophysical methods help in locating groundwater aquifers and assessing water availability?
8. Explain the role of environmental regulations play in preventing water pollution and conserving water resources?
9. How the sustainability assessments guide policy development and water management strategies?
10. Explain, how the grey water footprint relates to wastewater management and industrial discharge practices?
11. Describe the role of sustainability assessments in achieving global water sustainability.
12. Compare blue water foot print with other types of water footprints?
13. Explain the concept of reuse and recycling of water.
14. Analyze the impact of water conservation on agricultural productivity.
15. Assess the feasibility of adopting water reuse and recycling in daily household activities.
16. Explain the importance of subsurface groundwater investigations.
