

TABLE OF CONTENTS

Paper No	Title	Page No
1	DepHNN: A Hybrid CNN–LSTM Approach for EEG-Based Depression Detection	1-8
2	Smart Heart Risk Analyzer with Blockchain Verification	9-11
3	A Next-Generation Adaptive Semantic Video Transmission Framework for Wireless Networks	12-15
4	Intelligent Multi-Attack Detection System: CSV-Based Analysis Using GNN and Random Forest on CICIDS Dataset	16-19
5	Smart Defense Vision : Missile Detection and Motion Analysis on Streamlit.	20-23
6	Towards Zero Touch Networks: Cross-Layer Automated Security Solutions For 6G Wireless Network	24-27
7	Deep Hybrid Attention Framework for Underwater Clarity and Sea Cucumber Recognition	28-31
8	CyberChain: Enhancing Document Security with Blockchain and AI	32-35
9	AegisPulse: Real-time network intrusion detection using hybrid deep learning and live attack simulation	36-38
10	AgroSense - A Remote Monitoring Greenhouse Agricultural Farming with Edge Computing System	39-42
11	Smart Farming Solutions for Crop Disease Detection and Control Using IoT and Machine Learning	43-46
12	Chain Crop nexus: Where Agriculture Meets Blockchain	47-49
13	CNN-Based Mammographic Breast Cancer Detection with Enhanced Accuracy Using Pectoral Muscle Removal	50-54
14	Machine Learning-Based Intrusion Detection Framework Trained on the UNSW-NB15 Dataset for Cloud Environments	55-58
15	Ransec – Empowering Cyber Defence using AI Powered Expert Systems	59-61
16	PQ-Brahmi: A Quantum-Resistant Secure Messaging Framework Integrating Lattice-Based Cryptography with Ancient Brahmi Script Obfuscation	62-64
17	Unified Detection of IT and Mobile Network Attacks	65-68
18	Image Classification-Based Ransomware Attack Detection Using Deep Learning Algorithm	69-74
19	Breast Cancer detection using Thermography and Deep learning techniques	75-78
